

A RISKY ACQUISITION

Part one. Introduction

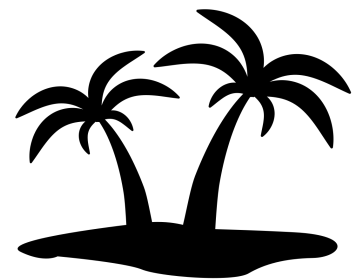

This is the story of a group of property buyers
A group of property buyers with very dangerous lives
A group of property buyers who make risky acquisitions
In their housing market, competition is fierce

The story takes place on a tropical beach
With white sand and shallow water
It's a beautiful place
But it's also a dangerous place
It's the home of many monsters – monsters with big teeth
They are hiding in the deep water

In this world
Everyone needs protection
Protection against those monsters
Everyone needs a secure home
And today, there is new real estate on offer:

- A very small property
- Only big enough for one person
- A sea view

Perhaps this sounds like a nice little place to live
But this property has a dark side:
The previous owner was eaten alive by a toothless giant
He was eaten alive in his own home
His name was Victor
Let me explain

Part two. Victor's Story

Earlier that morning
Victor had been exploring the shallow water
He thought that it was safe
After all, the tide was out and the monsters couldn't reach him
But Victor completely forget about the toothless giant

The toothless giant appeared from out of nowhere
Victor tried to run away
But the giant was too fast
Victor tried to escape into his home
But there was no escape!

Part three. Henrietta's story

The smell of death is carried through the sea
This is a smell that Henrietta is familiar with
Let me explain

Henrietta is one of those property buyers
And this smell means that it's time for her to go to work
She uses the smell to find Victor's property
And when she arrives at the scene, she looks up and sees...
The toothless giant sucking the last pieces of meat out of poor Victor's home

Unfortunately for Henrietta, she is not alone
Others have arrived at the scene
They too want this new property

They all wait nervously for the giant to finish his meal
Because then, the property will be ready for release

But Henrietta can't wait any longer
It is time for her to make the risky acquisition
She climbs up the giant
She walks in through the front door of Victor's property and...
She makes herself at home

Fortunately, the plan works
The giant releases the property with Henrietta safely inside
For Henrietta, this new home is more secure than her previous one
And this is the perfect moment
Because the tide is coming in
And so are the monsters
